Indra – 1.8m X/Ka-band installation on Spanish Frigate

Business Areas

High performance stabilized
VSAT antennas for maritime use
– Product name C2SAT

C2SAT

AIMS a fully owned subsidiary
developing and manufacturing
Inertial Measurement Units (IMU)

Advanced Inertial Measurement System (AIMS)

AIMS a fully owned subsidiary to ASTG

Maritime VSAT

Un-manned trucks

Military applications

Race motorcycles

AIMS designs, develops and manufactures **Inertial Measurement Units (IMU)** for measuring movements and attitude in a three dimensional world.

Most of AIMS business cases require a **customised** version of the IMU based on the end-user's special requirements.

AIMS works closely with leading partners in developing optimized solutions for **various applications**.
